

“Celebrating Pink Day with vibrant creativity!”

Senior KG celebrated Pink Day with various activities. The children made palm print flamingos and learned about mixing colours from their teachers. They came dressed in different shades of pink and participated in a parade to showcase the variety of pink hues. Additionally, each child brought a pink object and spoke about it.

“Honouring Patriotism and Brotherhood: A Celebration of Unity and Joy!”

The Pre-Primary celebrations beautifully highlighted the themes of patriotism and brotherhood. Through vibrant performances and meaningful discussions, the students embraced the spirit of national pride and the bond of sibling love, making it a day of unity and shared values. The children participated enthusiastically, showcasing their talents and understanding of the festivals. The event fostered a sense of community and deepened the students' appreciation for the cultural significance of these special occasions.

“Pre-primary students' Hands-on language Fun!”

Our Pre-Primary students engaged in an enriching language activity designed to foster language learning through interactive play. This activity engaged our students in sorting and matching letters to pictures and words starting with the first four letters.

This hands-on exercise enhanced their fine motor skills, teamwork, and letter recognition abilities. Through this interactive play, the children deepened their understanding of phonetics while enjoying collaborative learning.

Exploring and learning! Pre-Primary children enjoyed discovering different rooms and household items while learning about home safety.

The teachers prepared and showcased models of different rooms to the pre-primary children, who enjoyed exploring each model.

The children eagerly identified various items found in each room, such as furniture and household objects. Additionally, they learned about safety at home, understanding the importance of staying safe in different areas. The interactive and visual nature of the activity made learning engaging and memorable for the children.

Grooving to the beat!

Pre-primary students enjoyed a rhythm and movement activity, enhancing their listening skills and coordination through musical exploration.

A rhythm and movement activity was conducted for the Senior KG students, where the children listened to various sounds made with musical instruments and moved in response to the music. This activity enhanced their listening skills and helped them distinguish between various musical tones and rhythms. It also improved their coordination and motor skills as they moved according to the music. The activity fostered creativity and self-expression, encouraging the children to interpret and react to different sounds through movement. Overall, it was a fun and educational experience that supported their sensory and physical development.

“Crafting Skills: Building a House of Creativity, One Torn Paper at a Time!”

The children participated in a paper crumbling, tearing, and pasting activity, where they strengthened their fine motor skills by crumbling and tearing paper into small pieces. They then creatively pasted the torn paper onto an outline of a house, enhancing their hand-eye coordination and spatial awareness. This hands-on activity not only supported their motor development but also allowed them to express their creativity in a fun and engaging way.

“Enhancing Vocabulary through Fun: Senior KG students master three-letter 'a' family words with an exciting Bingo game!”

The Bingo Activity was conducted for Senior KG students to enhance their vocabulary skills, specifically focusing on three-letter 'a' family words (like cat, bat, and mat). The children actively participated, listening carefully, reading the words, and marking them on their Bingo cards. This fun and interactive session not only reinforced their understanding of these words but also improved their listening and reading skills, making learning an enjoyable experience for them.

“Sorting Sizes: Exploring Big and Small with Creative Play!”

“Senior KG students engaged in a 'Big and Small' activity, where they actively sorted and placed objects on a chart according to their size. This hands-on experience helped them understand the concept of size differentiation while enhancing their observational skills and cognitive development.”

“Learning Quantities: Junior KG Students Explore 'More or Less' with Hands-On Fun!”

Junior KG students learned the concept of "More or Less" through a hands-on activity, where they compared different quantities using real objects.

This interactive approach helped them grasp the idea of quantity comparison in a fun and engaging way. The activity also reinforced their counting skills and understanding of basic math concepts.
